

Type: Cybot Galactica

1P0 Human-Cyborg Relations Droid

Dexterity: 1D

Knowledge: 1D

Alien Species 3D, Bureaucracy 4D, Cultures 5D,

Languages 7D

Mechanical: 1D

Perception: 1D

Strength: 1D

Technical: 1D

Equipped with:

Humanoid Body (two arms, two legs, head)

Two visual and two auditory sensors - human range

Vocaluator speech/ sound system

A-22 VerboBrain

TranLang 1 Communications module with over half a million languages.

Move: 7

Size: 1.7 meters tall

Cost: 500 (used)

Description: The 1P0 is the first model in the series that led to the successful 3P0 range of droids, and has many of the same features, which of course were more advanced by the time the 3P0 was designed. The 1P0 is slow and clumsy, and has a far less advanced brain than the 3P0, but does have data processing modules in a couple of other areas than just translation. This has led to some of these droids being left in offices and data processing centres on backwater worlds. Their personality is subservient, but their poor quality droid brain may cause them to have problems understanding and following any but the most simple instructions, a fact which their articulate grasp of language may belie.
