    Two visual and two auditory sensors - human range
    Rudimentary Vocabulator speach system
    W-35 Processor

Move: 9
Size: 2.2 meters tall
Cost: 900 (used)

Description: The Loader Droid was built by the Trade Federation for loading cargo aboard its freighters, and due to the number of these droids built and the fact that they aren't combat droids, a lot of these have survived the fall of the Trade Federation and have since appeared on the open market. Since they were designed to operate aboard freighters away from droid control ships, they have their own droid brains, which although are simplistic, they have developed individual personalities over the years and while they are not the best of conversationalists many of their owners have grown quite attached to them.

Page designed in Notepad, logos done on Personal Paint on the Amiga.
