  - Fire Arc: Front
  - Scale: Walker
  - Skill: Vehicle Blasters
  - Fire Control: 3D
  - Range: 50-500/2/4km
  - Damage: 4D

Description: The Pummel class Repulsor Tank is the front line Imperial Repulsor Tank. Imperial forces have been forced to start using repulsor tanks since production of ATAT and ATST walkers has been reduced, and the Raptor sees use as the main battle tank of choice for Imperial forces. With its combination of Anti-Speeder weaponry (which can be used on infantry as well) and its powerful Anti-Walker weapons it can cause a great deal of damage to enemy forces. The Ion

Cannon allows Imperial forces to disable sheild generators and enemy starships, capturing bases, vehicles and supplies intact, an important objective since the battle of Endor.
