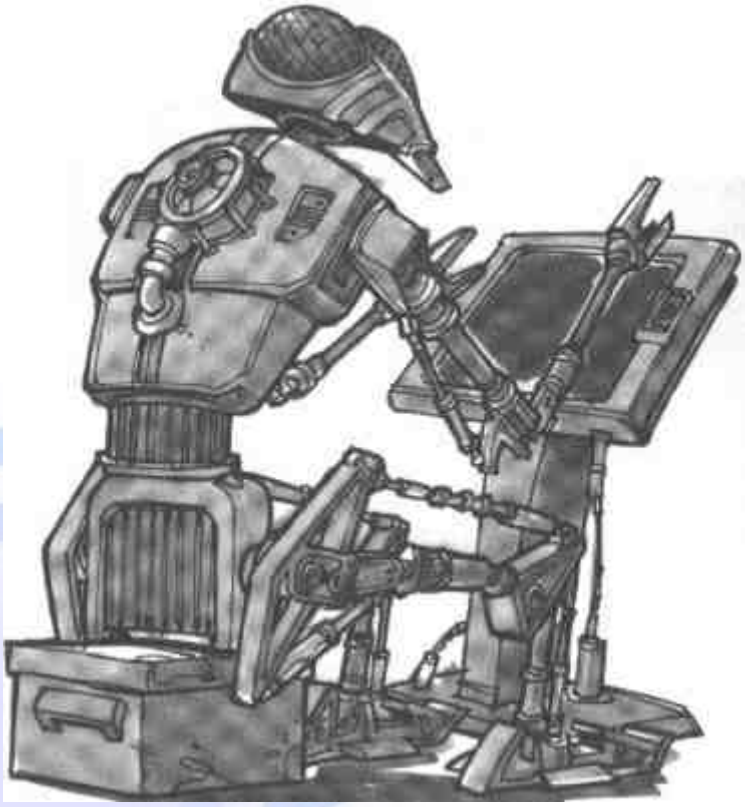
Droids D6 / Roche J9 Worker Drone



Type: Roche J9 Worker Drone
Dexterity: 1D
Knowledge: 3D
Languages 8D
Mechanical: 2D
Communications 5D, Sensors 5D
Perception: 1D
Strength: 2D
Lifting 4D
Technical: 2D
Computer Programming/Repair 6D, Droid Programming/Repair 5D

Equipped with:
Humanoid Body (two arms, two legs, head)
Two Visual Sensors - High Frequency Range as well as Human Range (ultraviolet)
Two Auditory Sensors - Human Range
One Olfactory Sensor
Torplex Microwave Sensor
Arjan Vocabulator speach system
Arjan II logic Computer
Tranlang II Communications Module (1 Million languages)

Move: 7
Size: 2.0 meters tall
Cost: 1000 (used)

Description: The J9 Worker Drone was built by the Verpine of the Roche hive, and resembles a stretched out preying mantis. The insectoid look to this droid made it unpopular with the majority of mammalian species in the galaxy, and the production run was therefore fairly short as sales failed to materialise. The Worker drone name was unfortunately taken literately when the droids were sold off at discounted prices, and most of the droids have ended up working in factories and loading facilities, a pity given that they are as advanced and intelligent as protocol droids, and have a wide variety of skills. The Arjan vocabulator system used in these droids is keyed to the frequencies used by Verpine and many other insectoid species, making the droids voice somewhat "bussy" but still easily understandable in all of the 1 million + languages that the droid speaks.

Page designed in Notepad, logo`s done on Personal Paint on the Amiga.
