Description: The Javellin is a heavily armed starfighter designed along similar specifications to the X-Wing, with four swivelling Heavy Laser Cannons. These cannons give a wide field of fire, and their targetting systems are very advanced giving the fighter truly excellent fire control, which combined with the power of the four cannons makes the fighter extremely dangerous in combat. The Javellin has sold in small numbers due to fierce competition in the marketplace, and the poor hyperdrive system the fighter is equipped with. These fighters are used by a few independant worlds during the New Republic era, making the power of the vessel against that of X-Wings, Tie Interceptors and the more advanced vessels

which came available in this time period.
