B-IV BULK FREIGHTER

The B-IV Bulk Freighter is the bulk freighter of choice in the Elrood sector, and is infact one of Elrood StarYard's best exports from the sector. This craft combines reliability with a large cargo capacity as well as a respectable price tag. These ships have become renowned for their sturdiness and reliability in space. They can be treated like dirt, and will still perform well, however, if looked after the performance is outstanding. Because of their size, they take a long time to make, and the current turnover is about 4 whips per year, however, these are eagerly snapped up by corperations and businesses.

The success of the craft however, is drawing the attention of both the Empire and the Rebellion, both of which are a cause for concern for Elrood StarYards who fear the domination of the Empire and the illegality of the Rebellion. A number of members of the StarYard's board have rebel sympathies, and rumors exist that they are trying to do a deal with the Rebellion. The nature of this deal is unknown.
