Description: Although inferior in many ways to the SoroSuub Farsight sniper rifle, the F-31 is an accurate long ranged weapon, with a decent capacity in its energy clip. The advantages the F-31 has over its competitor, is the ability to fire multiple shots, and a lower price, both of which has made the F-31 more common than the more specialist Farsight. The optical sights mounted on top of the weapon add 1D to shots being made at extreme ranges, and are tough and robust enough to handle being battered about in battle conditions.
