Description: This is the same vehicle that Raxlo used for cutting down trees on Federian, except with a mining attachment. This time it was used for drilling and gathering the hardened tree sap from the Trees on Tenoo, the chunks of this sap were stored in external containers which were detached with the drill when the vehicle prove too large to escape the flooding waters under the tree.
The single drill attachment was larger and more dangerous than the cutting blades, but the extra

weight slowed the vehicle down when it was using it's tracks.
