Description: The CEC Republic Cruiser was a diplomatic transport sold exclusively by the Corellian Engineering Corporation to the Old Republic, and served for many years as the primary courier of Diplomats and Ambassadors within the Republic. The Republic Cruiser shows a number of similarities to the Corellian Corvette including high speed, maneuverability and shields, in fact although the Republic Cruiser is not armed, it has an extremely tough hull and powerful shields for a ship of its size. This has led to Republic Cruisers being much valued ships by free captains and traders, since their weapon free status can be changed by simple modifications and even though their cargo space is limited their toughness is much prized. Republic Cruisers were retired from service as the Clone Wars started when they became obvious targets for the Confederacy to strike at, and armed vessels such as the Corellian Corvette were used instead.
