Description: Terrans developed the GTM Hippocrates early in the post-war Reconstruction period. With the outbreak of the NTF insurgency, the GTVA has once again called the Hippocrates into active military service. Its on-board facilities provide state-of-the-art medical care to thousands of patients. Hippocrates also help transport refugees out of contested systems into the safety of Allied-controlled regions. The unusual design of the Hippocrates enables its crew to isolate sections of the ship quickly in the event of quarantine or hull breach.
