Starships D6 / Xi Char Luxury Shuttle

Xi Char Luxury Shuttle

The Benevolent III is the luxury transport shuttle of Baroness Omnina of the Vena system. Made by Xi Char (the manufacturers of the Trade Federation's characteristic droid starfighters), the luxury shuttle is a large beetle-like craft with a bulbous upper hull and a narrow keel upon which are mounted two powerful ion engines. A small sensor-cluster at the head of the ship also contains a single laser cannon better suited to self-defense than an offensive role. The shuttle lands on three short, spindly legs.
