Starships D6 / Altarren RB34 Transport

Altarren RB34 Transport

The Altarren RB34 was originally designed to serve as a small version of the DS9 drop-ship but it soon began filling many other roles ranging from simple courier duty to light cargo runs to actual combat drops.

The RB34 used the same modular capsules as the DS9 drop-ship but was limited to only carrying a single capsule at a time. RB34s were usually used as a rescue/retrieval ship as its the top atmospheric escape speeds were faster than that of the DS9.
