Description: The MD-15C medical droid was a model of medical droid with a humanoid body shape and white plating. Their two arms had modular appendage sockets at the elbow joint and their featureless faces were designed to be non-threatening. An MD-15C medical droid was stationed in one of the private medical suites onboard the Resistance's MC85 Star Cruiser Raddus and treated General Leia Organa there in the year 34 ABY, when she was injured during an attack on the Resistance fleet by the First Order.
