

Droids D6 / Temere Corp PARA-5173

Temere Corp PARA-5173 "Squidy"

The mysterious Temere Robotics Corporation's "Black" project. It was created for a very simple purpose. That purpose is the utter destruction of a capital ship through means it cannot defend against. Their size combined with stealth coating and some sensor baffling equipment the droids are nearly undetectable by capital ships. The droids maneuver in, usually in groups of 4-10, then once close in to the ship turn off thrust and drift in. From there they attach to the hull of the ship and move to key entry positions. They use cutting torches to breach the hull, from there they can either enter the ship or move on exposing section after section to the vacuum of space.
