Description: the Viceroy class Attack Cruiser was designed and built by the Royal Arsenal Corporation in tandem with both the Regent Class Carrier and the Mark IV King Jasson class Heavy Cruiser, the Viceroy is intended to bring a similar level of firepower in a ship with a faction of the size and crew and it does however it lacks the King Jasson's ability to carry large amounts of fighters or troops

Characteristics: the Viceroy is a blunted rectangle in shape with five sublight engines at the rear and a docking bay in the forward ventral section, the Model A also have its missile launchers in the forward section and both models have two of their tractor projectors either side of the docking bay, the turbolasers and in the Model B ion cannons are arrayed in pairs amidships on the dorsal and ventral surfaces, laser batteries are visible as pin picks of lights all over the ship which the uninformed might mistake for windows.
