Droids D6 / Arakyd Industries HL-444 hover l

Name: Arakyd Industries HL-444 hover loader
Manufacturer: Arakyd Industries
Class: Labor droid

Dexterity: 1D
Knowledge: 1D
Mechanical: 1D
Perception: 1D
Strength: 3D
    Lifting 5D, Stamina 4D
Technical: 1D

Equipped with:
    One visual and one auditory sensors - human range
    Binary vocabulator
    Lifting Clamp (+1D to Lifting)
    Repulsorlift engine

Move: 15

Description: Arakyd Industries HL-444 hover loaders were deployed on landing platforms throughout Coruscant, assisting in light cargo relocation and droid traffic control with magnetic claws. They could also be found in the Jedi Temple hangars. The model employed a light repulsorlift engine, and required an operated versed in binary in order to function. Seeing in a 360 degree view, the droid could avoid potential obstacles while moving cargo; however it could not see directly above, or below itself.

They were also deployed to hyperspace ring stations, where they assisted in the refueling of Jedi and clone trooper starfighters.

After the purging of the Jedi Temple, HL-444 loaders were used to carry dead Jedi to be cremated on the steps in front of the temple.
