Droids D6 / Mini-Huvicko/Yuzabi Dowser Bina

Type: Mini-Huvicko/Yuzabi Dowser Binary Hydromech Droid

DEXTERITY 2D
KNOWLEDGE 1D
Languages; droid languages 5D, Languages; Moisture Vaporator 4D
MECHANICAL 1D
PERCEPTION 2D
Search; Water 4D+1
STRENGTH 1D
TECHNICAL 2D
Machinery repair 4D
Equipped With:
-Video sensor
-Dual-tread locomotion
-Fine manipulator arms (+1D to repair skills)
-Moisture Sensors (+2D to detect water)
-Various tools
-Cybot acoustic signaler (droid languages)
-Filtered moisture extractor (Collects 0.5 Liters per day)

Move: 7
Size: 1.4 meters
Cost: 350 (used)

Description: The Mini-Huvicko/Yuzabi Dowser binary hydromech droid, also known as the M-HYD, was a model of hydromech droid used to locate and harvest subterranean water sources and communicate with moisture vaporators. The model saw use on Tatooine when the captain of the Lucky Despot brought a shipment of them to the arid world. However, prospectors grew frustrated at the many failings of the model, and as a result, many units were abandoned. One such unit was M-HYD 6804, which became a mainstay in the hold of Chief Nebit's sandcrawler.
