Starships D6 / Delta-Wing Attack Cruiser

Delta-Wing Attack Cruiser

Cygnus Spaceworks' GZ3-L Delta-Wing Attack Cruiser was designed to mainly to fill the gap in Cygnus' corporate fleet between their large battle cruisers and their JV-7 Delta-class Escort Shuttles. The ship itself is a essentially a large wing with a pair of massive ion drive engines near midship. The main command cabin is located on the front of the ship where the two elongated and swept back wings connect. It has found many uses ranging from patrols to heavy assaults to exploration to escort duty.
