Starships D6 / Spitball Corvette

Spitball Corvette

This lovely ship by Verdant Spaceworks, was essentialy a CEC CR-90 Corvette that was slightly modified. Some of the cargo space was taken out and a few of the weapons were stipped away and in their palce banks of concussion missile launchers were isntalled. These launchers could fire seperately or in linked banks for maximum firepower. The ship gets it's name from a popular manuver for priates to use with this vessel, where they roll the ship to keep fresh launchers pointed at the enemy ship. This can be used once to fire a single "spitball" of concussion misisles at the target to cover the launch of the fighters from the small ventral bay built into the ship.
