

Weapons D6 / Model 203 Grenade Launcher

Model 203 Grenade Launcher

Mestic Munitions Model 203 grenade launcher is the standard grenade launcher used on many of Mestic's various slugthrower rifles, especially the AR-15 assault rifle. It uses specially made grenades which can be hard to come by but are generally a bit cheaper than most standard grenades. It doesn't quite rank highly when compared with many of the grenade launchers used by the Empire or the Republic, but in the words of a Mestic representative, "there ain't gonna be no reason that ya should be firing these things more than 200 meters."
