RanCorp Selplex-23 Nerve Gas

Selplex-23 is a very deadly form of nerve gas. It gets breathed in and quickly gets into the bloodstream and attacks the nervous system. The gas has been known to cause permanent disabilities or leave people weaker for the rest of their life. Many times the gas kills its victims but occasionally some are strong enough to be left conscious or even on their feet still. But because this gas stays active for so long and is so concentrated this is very rare. It is favored for use against enemy encampments for obvious reasons, but some corrupt governments have been known to use these grenades on rioters.
