Description: Fern and KB's hoverbike was a modified two–being hoverbike owned by the human Fern and her friend KB on the planet At Attin during the New Republic Era.

Characteristics
The hoverbike stared as simple two–being speeder owned by the human Fern and her friend KB on the planet At Attin during the New Republic Era. The pair modified the speeder with a more powerful engine. It was 1.64 meters long, 1.12 meters wide, 0.84 meters high with a side seat.

History
Around 9 ABY, the day before the Career Assessment Test, Fern and KB rode to school on the bike, taking a short cut through the forest. After school while taking a jump out of a tunnel the speeder scraped the ground and eventually came to a stop. After getting it back to KB's home, KB noticed that the power converter was burnt out and they needed a replacement.
