RanCorp Bio-engineering Organic Gill

The Organic gill was originally bred on the Water World of Mon Calamari but RanCorp Bio-Engineering took it and enhanced it drastically. The symbiote's life span is now indefinite as long as it stays saturated with water. The membrane that filters oxygen from the water also has clips for deep sea goggles and can hold comlink pieces firmly in place. These gills allow people to survive underwater as if it were their natural habitat.

Model: RanCorp Bio xeno-12 Organic Gill

Type: Organic Underwater Breather

Cost: 800

Availability: 1

Game notes: Allows any oxygen breather to breathe oxygen from the water as if it were air.

Com Link: Microphone and ear pieces are held snugly in place by the Gill's membrane. This comlink has access to thousands of public frequencies.

Deep Sea Goggles: These goggles act like nightvision goggles enhancing the passive phosphorescent light in the water.
