Hand Crossbow

The hand crossbow, in days of medieval kngihts and castles, was a crossbow small enough to eb concelealed but had little power and one shot. Modern crossbows, which are still popular with some, are more advanced. They use stronger building materials and more acurate bow tensions. Also instead of a single quaarel being loaded onto the crossbow, a 'clip' can be laoded in the bootom. It works jsut like a slguthrower, the clip opping up a new quarrel onto the bow when the last one is shot.
