

Weapons D6 / BlasTech PPC-4

Personal Plasma Carbine

With plasma weapons catching on sparsely throughout the galaxy, BlasTech needed a plasma weapon that would appeal to naval forces and boarding parties. The result was the PPC-4 (Personal Plasma Carbine). The PPC-4 is a direct variant of the PPR-2. The stock was shortened and the overall size reduced by nearly 15%. Unlike the PPR-2, the PPC-4 doesn't use the standard plasma clips (the PPR-2 required two at a time), thus allowing the PPC-4 to operate perfectly with only one clip, the only downside is that it cannot use the standard BlasTech plasma clip like the PPG-1 and the PPR-2 does.
