

The Force D6 / Control Energy

Control Energy

Required powers: absorb disipate energy, control pain

Control Difficulty:

Intense Sun 8

Solar Wind 14

Fire 16

Radiation Storm 18

Blaster Bolts/Force Lightining 12

Note: This power can be kept up.

Effect: This was the second half of the absorb/dissipate energy force power which was forgotten long ago. New developments have turned it up. Upon a successful us of absorb dissipate energy a jedi may use this power to direct the energy elsewhere or use it to add to his own power. In game terms a jedi may use this to move the energy elsewhere along lines it would be able to travel(example: Corran Horn is being jabbed by a stun baton. he usses absorb/dissipate and sends the current through the metal decikng, a bothan walking by has his fur stand on end for a second) Or they may use it to power another force skil. In this case a second controll roll is needed with the difficulties mentioned above. If the user succeeds they get a bonus to the next force power they use equal to the damage absorbed. (example: Corran Horn is in the middle of an intense explosion and uses absorb/dissipate energy to stop the fire's effects. Because it's a powerful blast let's assume it does 4D damage. he sucessfuly controls the fire's energy and uses it to send an image out to everyone in the area of him walking from the flames. he gets to add 4D to his affect mind roll sending all the energy into that force power)

Note: A charchter inflicting damage, or having another person inlfict damage for him, upon himself for the purposes of using this pwoer to drain energy receives a Dark side Point. any charchetr using this power to enhance an offensive force power also recieves a dark Side point.
