

Starships D20 / Verdant Motors Shanda

Shanda Personal Transport/Freighter

The Shanda Personal Transport was designed by Verdant Motors to be a craft for a spacer on the go. It's a sort of combination of a low class yacht and a light freighter. It has a long missile like form with a X shaped group of tail-fins and a group of 6 powerful sublight engines. The craft has a dull yellow color to it from the alloy used in making it's hull. It's main defensive capabilities come not from the civilian level weapons it carries but from the Defensor Shield Globes. They are fit into snug depressions in the hull. These launch and spiral around the ship forming powerful reflective energy shields all about the ship, sometimes forming them to block shots rather than actually jsut cover the whole ship. The Defensors can also be drawn close togetehr to relase an energy blast all around the ship of signifagant magnitude. There is also an option to buy a droid rbain for the ship that can handle piloting, astrogation and other shipboard tasks for them.
