

Starships D6 / AF-38 M-Wing Starfighter

AF-38 M-Wing Starfighter

Developed by the dual system consortium Brayad-Nygurin, the M-Wing was designed to be an extremely fast fighter with both the maneuverability to outclass any fighter and have enough power to take on even full capital ships with only others of its class. Finding no way to accomplish this using conventional power plants, the design engineers decided to go with a more powerful, but dangerous power plant. Fitting the M-Wing with an anti-matter power plant, they found that not only did the craft have enough power to give a large boost to both speed and maneuverability, but it also had enough power increase the shields, and power a large array of weapons.

The main problem with this was the fact that if the power plant was hit and damaged, two thirds of the time the containment field will collapse, resulting in a catastrophic explosion that destroys the ship and everything around it (doing 2D (2d10x2) damage to everything within 500 meters 5D (5d10x2) within 100 meters).

Another problem with this design of fighter is the extreme change in performance when the power plant is brought to full power. With the enhanced thrust system energized and dumping pure power to thrusters, an inexperienced pilot is quickly thrown all over the sky, actually causing a -2D+1 modifier to maneuverability until the pilot achieves a specialized skill level. Once that level of skill is achieved, however, the M-Wing is a truly daunting opponent.

In the rear of the main body are two wells, which hold interchangeable weapons pods, which can hold proton torpedoes, concussion missiles, or a variety of other munitions like shield generators, ECM pods, cargo pods, or more lasers and or ion cannons.

Craft: Brayad-Nugyrin AF-38 MkII M-Wing

Type: Fast Assault Space Superiority Fighter

Scale: 11.5 meters

Skill: Thrust Enhanced Starfighter Piloting and Repair

Crew: 1 with gunner and Astromech Droid

Crew Skill: Varies widely

Cargo Capacity: 70 kilograms

Consumables: 1 week

Cost: 275,000 (new)

Hyperdrive Multiplier: x1

Nav Computer: Uses astromech droid limited to 10 jumps.

Maneuverability: 1D+2 / 5D+2 (Enhanced Thrust)

Space: 8 / 13 (Enhanced Thrust)

Atmosphere: 365; 1,050 kmh / 470; 1,350 kmh (Enhanced Thrust)

Hull: 4D

Shields: 1D+2 / 2D+2

Sensors:

Passive: 20/0D

Scan: 40/1D

Search: 65/2D

Focus: 3/3D+2

Weapons:

4 Laser Cannons (fire-linked)

Fire Arc: Front

Fire Control: 3D

Space Range: 1-3/12/25

Damage: 6D

4 Ion Cannon (fire-linked)

Fire Arc: Front

Fire Control: 3D

Space Range: 1-3/7/36

Damage: 5D

Proton Torpedo Launcher Pod

Fire Arc: Front

Ammo: 6

Fire Control: 2D

Range: 1/3/7

Damage: 9D

Concussion Missile Launcher Pod

Fire Arc: Front

Ammo: 8

Fire Control: 3D

Range: 1/3/7
