RGM-79 GM Mobile Suit

This is the Federation's first mass-produced mobile suit (MS). Though the Zeons were the first to come out with the concept of the MS, the Federation forces quickly realized their value. Unlike the Zeons, who diversified the kinds of suits they produced, the Federation focused on two designs. One was the GM, the other the G. The GM was designed for combat on either land or space, but it found its real niche in space. The GM was produced in the thousands, and proved itself quickly versatile and lethal, well-suited to the space battlefield it was intended for. Mobile Suits are massive, humanoid fighting machines, and hence have a walking speed and a jumping speed when in the atmosphere.
