

Starships D6 / DeathTek Nail DK-Nihilar

Nail Starfighter

This fighter is not exactly in standard use, despite its apparant effectiveness, due to the fact that, like all other vehicles made by DeathTek, its designers were encouraged to use non-standard design factors as much as possible. Projectile weapons used as standard limits how long this Starfighter can go without reloading, especially in an extended campaign. This made it ill reccommended for use by the Republic, much as many other designs, and yet, the fighter is still popular among mercenaries and pirates, who enjoy the effectiveness and firepower of this craft.
