

Vehicles D20 / Imperial WUT-AT Assault

Imperial WUT-AT Assault Walker

The Imperial WUT-AT was developed partially off the MT-AT design for a single purpose. that purpose was the siege of the planet Mon Calamari. Repeated attempts by the empire, after the battle of Endor, failed to bring the planet back in line. General Cauthron had the WUT-AT developed to siege the planet. The vehicle has a spiderlike body with a turret on it's thorax segment's back containing a heavy blaster. The vehicles can move at high speeds over the water. when it reaches a city legs unfold with powerful magnetic and grapple grips allowing them to climb completely vertical surfaces even such as walls. They can then employ their repeaters to wipe out enemy infantry and their grenade launcher to take down entire buildings.

Craft: Imperial Water/Urban Terrain Assault Transport (WUT-AT)

Class: Speeder [Walker]

Size: Gargantuan (10.9 m long)

Passangers: 30

Cargo Capacity: 200 kg
