

Metal Gear Nuclear Assault Walker

First of the MGS, or Metal Gear Solid, line the Metal Gear is a fierce weapon of destruction. The metal-gear are single trooper walkers which carry short range arsenal and pack a payload of various kinds of nuclear warheads. the Metal Gear is the prototype with it's six short-range trinity fusion warheads and 40mm chaingun. The craft is actualy more like a mech than a walker and has strong manipulators, which while not very dexterous, are quite powerful. The metal gear brand of mech-walkers have the ability to go through where regular walkers and repulsor vehicles can not, because of special magnetic graplers in their feet, making them an incredible comodity in harsh terain. Because of the Metal Gear's success more of the MGS series are being designed.
