

Type-52 Directed Energy Support Weapon

The Type-52 Directed Energy Support Weapon, otherwise known as the Plasma Cannon, is a manned automatic plasma turret in use by the Covenant.

It serves its purpose as a squad support weapon, used for suppressing enemies and defending Covenant positions. It is carried, deployed and crewed by green-armored Gunner Grunts, in addition to being wielded with portability by some Brute Chieftains. It is carried and operated in a similar fashion to the M247 GPMG made by the UNSC. It has an approximate 65 degree turn radius and 50 degree pitch. It fires plasma bolts similar to those of the Covenant Plasma Rifle, and fires around 300 rounds per minute. A battery or plasma core is built into the tripod which allows the gun to fire indefinitely. When removed from the tripod, the gun can only use the 200 units of power that the gun itself contains.

Model: Covenant Type-52 Directed Energy Support Weapon

Type: Personal Support Gun

Scale: Character

Skill: Firearms: Heavy Reapter/ machine gun

Ammo: 200

Cost: 9,500 credits (ammo box: 80)
