

Droidified enhancement Stealth combat armor

Type: Personal Battle Armor

Cost: 65000

Game Effects:

Basic Suit:

Skill: Powersuit Operation

+4D Physical

+4D Energy

+3D Strength (used for physical activity, not for resisting damage.)

Twin Retractable Force field Swords arms

Mono-molecular vibrating force field blade that can be extended to 1.5 meter by 1.5 meters wide any programed shape. Common shapes long sword , bustard sword, Round Shield and kite shield Safety tracking system does not let it come in contact with suit but distorts around it. Can cut threw any materiel that is not shielded.

Light blue haze is seen like ship shield, It is silent

Shield strength is 8d (+2D Melee parry roll to use)

Damage: STR+4D for weapon

Solar flare system Chest mounted Blind 10d seconds

HUD system: Fire Control for enhanced weapon use 3D {System need practice to learn hand held weapons. Will not work with other fire control in weapon Must use one or other}

Turbo-Projected Repulsor Grapple:

Uses either a physical or magnetic grapple. Wire guided 0-45/90/150m range. Mounted on the right arm.

Winch: Attached to grapple , has 250 kg capacity.

Hide and shielded holsters for hold-out blaster each arm add 3d to difficulty.

Shockweb system: Variable electrical charge can be applied through the armors surface. 1D to 6D (variable stun or normal damage)

Droidafacation of Exoskeleton {Heuristic Processor} Arguments movement acrobatic ,dodge, melee parry, jump and run +3d

Micro Repulsorlift anti grav system up to 100M Allow for rapid maneuvering along planes anywhere from 45-180 degrees opposite

normal gravity. Move is up to 20 meters per turn

Micro Truster space .5 3d Maneuverability under repulorlifts

Micro Tractor Field Boots and gloves

Description: These use a very short range tractor field to cling to objects allowing the user to walk normally in zero gravity, and to grip

onto the surface objects. Can support 200kg +3D Climbing

Holo-projector camouflage system project image of surroundings to visually mask it self (+3d opponent search visually)

Shadowskin reflec system +2D sneak sensors absorption

Odor shield: Odor shield is a low grade molecular barrier that contains and vaporized odor molecules close to the user. Within this field it

break apart the molecular bonds of odor-causing compounds. Eliminating both odors and harmful contaminants. Thus removing

99.9% of the user odor. +3D Hide against tracking by odor

Holographic Image Disguiser: The image projected had to be at least the same size as the wearer, but is highly detailed and moved with

the object or person covered, Its memory capacity can store five holographic image. The holo-projection is almost perfect and even

moves as the item or person shrouded moves. It takes a Difficult search roll to detect a fake, though sensors and visual.

Sensor No-Show system adding +2D to sneak in regards to heat and infrared sensors

Power system : Micro Nvidium power generator

Personal shield : +7D particle/energy Defense, weapons will not work will active

Acoustical sound dampening filters :

Body Glove : A climate-controlled body glove incorporates additional heating and cooling elements to allow comfortable operation in

extremely hot and extremely cold climates. {160c to -120c}

Polarized helmet viser : Protects and nullifies all stun damage from visual sources (for instance, flash canisters or grenades).

Anti-Radiation: The armor is treated with a radiation reflective coating, which insulates the wearer against heavy radiation zones. 3D

Armor incorporates a Cortosis-weave to make the resistant to light saber damage

Environmental Filter: Filters out all harmful particles from the air or seal with 15 hours of recycled air.

Sureseal Patch system: Automatic patches against suit leaks

IR/motion Sensor: +3D PERC in darkness and/or against moving targets, ahead and to both sides.

Sensor Pod: +3D Search, 25-200m

Olfactics enhancement Sensor +2d Track 0-50m

Macrobinoculars +3D Search, 100-1500m

Color Night Vision Imaging: Magnifies available light for excellent low light vision (no penalties for darkness).

Ultrasonic wave motion sensory system: Gives distance and shapes of objects were zero light 50 meters.

AI Tactic analysis HUD: Projects from sensor data, location and number of enemies over laying outline on HUD

Auditory Enhancement sensors + 3D PERC

Broadband Antenna:

Can receive holo and visual imaging. 800-kilometer surface range, surface to High orbit in harsh weather. Point-to-point capable.

Can intercept and decode most communications frequencies. Can patch into shipboard and vehicular communications systems.

TranLang 3 Communications module 8d languages

Can record and translate incoming sound Giving HUD sub-text display or audible translations
