Description: The Nephilim class bomber is the most alien of the Shivan ships. We are still unsure as to why the Shivans chose this odd shape for arguably their most powerful attack craft. However, with four primary cannons and two turrets, as well as a massive payload, the Nephilim is undoubtedly a serious threat to the GTA. We have already lost two Orion class destroyers to a wing of Nephilims. Unless we learn a weakness soon, we will most likely lose two more.

The Nephilim has been designated a Class A threat to GTA destroyers and cruisers. In unpopulated systems, it is to be considered a Class B threat.
