

GTM-14 Electromagnetic Pulse Advanced

The GTM-14 Electromagnetic Pulse Advanced warhead interferes with the electronics systems of vessels caught within its blast radius. This renders the affected ships unable to track targets, manage communications, or gain aspect missile lock. Tactically, the GTM-14 is a very effective anti-bomber weapon, as it also temporarily shuts down the guidance and propulsion systems of warheads in flight. This advanced version of the standard EM Pulse missile disrupts subsystems at a deeper circuitry level, resulting in a longer-lasting effect.
