

Starships D6 / Oppressor-class Escort C

Oppressor Escort Carrier

The Oppressor-class escort carrier was a very limited production variant of the standard KDY escort carrier that is commonly found in use throughout the Imperial Navy.

Physically it is nearly identical to the original KDY escort carrier with the exception of a concussion missile turret on the bottom of the vessel and a pair of tractor beam projectors on either side of the hangar bay to help guide vessels in and out (this is especially useful when bringing in a damaged ship). The Oppressor is capable of carrying a much wider array of starships on board than the standard carrier, giving it more flexibility and making it more valuable to Imperial Fleet Command. In addition to the extra starship carrying space, the Oppressor also maintains up to forty Zero-G assault stormtroopers and a Gamma-class assault shuttle to ferry them into battle.

Only about thirty Oppressor escort carriers ever left the shipyards and are all scattered across the galaxy and in the hands of several different Imperial warlords. Grand Admiral Thrawn put the few Oppressors he had under his command to good use as self contained mobile starfighter bases that conducted raids on several key New Republic bases and starships.
