

Name:: Vulptereen 327 Podracer

Manufacturer: Vulptereen

Class: Repulsorcraft

Length: Cockpit: 3.66 meters; Engines: 7.92 meters

Maximum speed: 760 km/h

Crew: 1 pilot

Passengers: None

Skill: Repulsorlift operation: Podracer

Crew: 1

Crew Skill: See Dud Bolt

Cargo Capacity: 5 kilograms

Cover: 3/4

Altitude Range: Ground - 65 meters

Manoeuvrability: 2D

Move: 253; 760 kph

Body: 3D+1

Description: The Vulptereen 327 was a Podracer model created by the Vulptereen species. Some manuals referred to it as the RS 557. The Vulptereen pilot Dud Bolt owned a Vulptereen 327, and used it during the Boonta Eve Classic of 32 BBY. During the third lap, Bolt intentionally slammed his pod into the Podracer of competitor Ark Roose. Although Roose crashed, Bolt crashed his own pod as well. Bolt later returned to racing with a Vulptereen 327. Another pilot used a Vulptereen 327 during the Vinta Harvest Classic race on the planet Malastare.
