

# Starships D6 / Large Landing Ship

## Large Landing Ship

A single Assault Transport is designed to carry a corps, but often carries less than a full corps as subordinate elements are assigned to other vessels. It can easily transport a Line Corps (69199 men, 2970 vehicles), but would need help of other transports to carry a full armor corps (74794 men, 6347 vehicles). Because of their great size, Assault Transports cannot land on planets. They must be serviced by shuttles, barges, or other surface-to-space vessels. The transport includes hangar facilities for the ground support wing of 40 TIE's.
