Voodoo-class Star Destroyer

Imperial Admiral Zaolus designed the Voodoo-class Star Destroyer during the beginning of Thrawn's campaigns against the New Republic. The Republic's forces were continuously being reinforced on planets in the Mid- and Outer-Rims, helping to defend against attacks by Imperial Remnant forces.

The Voodoo Star Destroyer was designed as a long-range convoy raider, intended to attack New Republic resupply vessels with stealth and surprise. Zaolus knew the importance of supply to Republic outposts and deep-space bases, and wanted to attack them at this point.

Voodoo-class vessels are slightly smaller than standard Imperial-class Star Destroyers, but are relatively similar in appearance. The Voodoo is equipped with two gravity well projectors intended to stop New Republic vessels travelling in hyperspace, where the destroyer can then let the surprised convoy feel the full effect of its heavy turbolasers.

Although Voodoo Star Destroyers are given general briefings on New Republic convoys in a sector, they rely on TIE/rc Reconnaissance Fighters for most of their regular reports on Republic positions. The TIE/rc's are sent ahead of the ship and look for any enemy resupply vessels in the area. If any are found, their positions are relayed back to the ship and the vessels are intercepted.

Kuat Drive Yards produced several hundred Voodoo-class Star Destroyers for use with Admiral Zaolus raiding fleet, and mixed results followed. The Voodoo worked well when engaging standard convoys, but was not capable of handling well-escorted supply chains. A pair of escort frigates can generally handle a Voodoo-class vessel, or at least distract it long enough for the remainder of the convoy to blast into hyperspace.
