Lock and Load Gunship

Kevlar United felt that with the increasing use of starfighters during the days of the Empire, that an effective Anti-Starfighter starship was needed. That's where the Lock And Load Gunship comes into play, named after the popular saying by soldiers before going into combat. Most of the ship's interior is small and narrow, due to the number of missle bays taking up space. The crew of this ship is low, which out classes the Corellian Gunship. The concussion missle launchers can be easily modified to carry advanced missles as well to take out the much faster, more popular fighters.
