

Name: Kuat Drive Yards Cantwell-class Arrestor Cruiser

Scale: Capital

Length: 800 Meters

Skill: Capital Ship Piloting: Imperial Arrestor Cruiser

Crew: 2,770 officers, pilots and enlisted crew; skeleton 480/+15

Passengers/Troops: 144 troops, 4,050 Passengers

Crew Skill: Capital Ship Piloting 5D+1, Capital Ship Gunnery 4D+2, Capital Ship Shields 4D+1

Consumables: 1 Year

Cost: 2,200,000 credits

Cargo Capacity: 600 Tons

Hyperdrive Multiplier: X2

Hyperdrive Backup: X12

Nav Computer: Yes

Space: 6

Manoeuvrability: 0D

Hull: 4D

Shields: 3D

Sensors:

Passive: 45/1D

Scan: 90/3D

Search: 180/4D

Focus: 4/4D+2

Complement:

24 starfighters (two squadrons)

Several TIE fighters

At least one TIE Boarding Craft

Various shuttles, landing craft, and utility vehicles

Weapons:

12 x Light laser cannons

Scale: StarFighter

Fire Arc: 3 forward, 3 starboard, 3 port, 3 aft

Fire Control: 2D

Space: 1-3/12/25

Atmosphere Range: 100-300/1.2/2.5km

Damage: 5D

3 x Turret-mounted Twin Heavy Ion Cannons

Scale: Capital

Fire Arc: 1 port, 1 starboard, 1 ventral

Fire Control: 3D+1

Space: 3-15/36/75

Atmosphere Range: 3-15/18/75km

Damage: 5D (Ion Damage)

3 x RT-17 repulsor-tractor beam emitters

Scale: Capital

Fire Arc: 1 Front, 1 starboard, 1 port

Fire Control: 5D

Space: 1-5/15/30

Atmosphere Range: 2-10/30/60km

Damage: 6D

**Description:** The Cantwell-class Arrestor Cruiser, also designated as the Cantwell-class 410 cruiser, was a type of cruiser used by the Galactic Empire. Manufactured by Kuat Drive Yards at the request of the Department of Imperial Justice and the Imperial Navy, it featured three powerful tractor beam projectors which it used to ensnare suspect vessels and steer traffic away from construction zones. One Arrestor was notably featured in an Imperial recruitment film played on Corellia and a few could be seen at The Death Star's construction site over Scarif.

### ***Characteristics***

Like some other warships used by the Galactic Empire, the Cantwell-class Arrestor Cruiser was shaped like a narrow arrowhead. However, the tip of the arrow was located at the stern of the ship, unlike the Imperial-class Star Destroyers for example. The inverted triangle-frame ended midway along the hull, leaving the front half of the ship long and narrow. Arrestor cruisers were uniformly painted a light shade of gray, in keeping with the Empire's preference for muted colors.

Vessels of the Cantwell-class were equipped with three turret-mounted twin heavy ion cannons (one port, one starboard, and one ventral), and twelve light laser cannons (three forward-, three port-, three starboard-, and three aft-mounted). They were also equipped with three powerful, dish-shaped RT-17 repulsor-tractor beam emitters: one at the bow, one at starboard, and one at port. They not only enabled the Arrestor to capture and draw in other starships, but also to push them away to an ideal distance for the Arrestor's ion cannons to disable the suspect ship's systems.

The warship had two large docking bays situated amidships, each housing a squadron of starfighters (24 fighters in total) as well as shuttles and TIE Boarding Craft, which allowed the ship's complement of stormtroopers to board a captured craft.

### ***Role***

The Cantwell-class Arrestor Cruiser was designed to ensnare and incapacitate any suspect starship, be it a freighter, a frigate or even another cruiser. During a capture operation, it pursued its target, only needing to maintain a distance of long range to bring its tractor beams to bear. Once the target was trapped, the Arrestor could either reel it in to disable it with ion cannons, or keep it at long range, allowing starfighter squadrons to carve it up. The Arrestor was also used to steer traffic away from construction

zones.

## ***History***

In the early years of the Galactic Empire's rule, the Department of Imperial Justice and the Imperial Navy campaigned for the creation of a warship designed to capture pirates, smugglers and other dissidents so they could be tried publicly. The program was approved, and the contract was awarded to Kuat Drive Yards. After three years of development and testing, the first Cantwell-class Arrestor Cruiser was commissioned into service.

In 13 BBY, the Arrestor Cruiser was in use in the Imperial Navy. At this time, the White Worms members Han Solo and Qi'ra attempted to escape the Core Worlds planet of Corellia by boarding a ship at the Coronet City spaceport. Whilst being pursued by stormtroopers, Solo saw an Imperial recruitment film that notably featured an Arrestor Cruiser flanked by a pair of Imperial I-class Star Destroyers.

Three years later, Solo was training at the Carida Academy as a pilot. He was part of Onyx Squadron of TIE brutes which was assigned to an Arrestor Cruiser. At one point, they engaged with pirate Z-95s, with Solo's starfighter becoming damaged. He guided it into the hangar, but knocked out two more starfighters. In the aftermath, he was sentenced at a tribunal and reassigned as an Imperial Army trooper in the Mimban Campaign.

In 5 BBY, Luthen Rael was briefly stopped by Captain Elk's Arrestor cruiser while entering the orbit of Segra Milo aboard his Fondor Haulcraft. Although he gave the Imperials a convincing—if fake—transponder signal, Rael soon found his ship trapped into the Arrestor's tractor beam. However, Rael broke away, and his haulcraft's powerful countermeasures allowed him to damage the Arrestor's main beam emitter. An irate Captain Elk then launched an air wing from the cruiser's docking bays, but Rael managed to defeat the enemy starfighters and jump to hyperspace.
