

Grand Admiral Thern Moudurn

Thern Moudurn first served with the New Republic as their Admiral, but he found their slow diplomatic ways a waste of time. They spent too much on voting and not enough on action. Moudurn then defected to the Empire and became the executive officer on the Imperial Star Destroyer Maelstrom. From there he was promoted to the rank of Commodore and given command of the Maelstrom. Through countless battles he received the rank of Admiral and was placed in charge of the Outer Rim Defense Fleet, with his command ship the Wraith. He finally received the rank of Grand Admiral after the transfer of Grand Admiral Geraad Kun to the position of Moff and governor of the Core Sectors.
