## Polvin Travix

Polvin Travix is a member of the dark council of Black Phoenix. Many rumors circulate about what Black Phoenix is. Those who have encountered members of its "core" are sure it's a group of dark jedi. Others say it's a secretive crime syndicate. Still others say it's a collection of bankers and businessmen who conspire to rule everything. In fact all of these things are true and yet none of them come close. The real origins of Black Phoenix aren't known by anyone, even its leaders. Most believe it was an order of loyalists to an old Dark Side Warlord. Whatever they were then, what they are now is quite different. The ruling heart of BP is a cadre of Dark Jedi, the most powerful of whom sit on the high council. The organization encompasses bankers, scientists, businessmen, and criminals as well though. They attempt to, as fully as possible, control the flow of history through every means possible. They do this because they think only the most powerful and most enlightened should rule. It is rumored that there is much political in-fighting among black phoenix as members crawl over each other to gain favor.

The Old Republic never even confirmed their suspicions of the group's existence, only found evidence suggesting it. When Polvin was turned he proved himself capable of handling the powers of not only the Dark Side, but of the Great Sith Magics. The Sith Magic granted him great power, including extended life. He is now a member of the Order's High Council. He has sent two of the best Dark Warriors the Order has to find and bring back the rogue Chagre, Gabriel certamen. Polvin is not a warrior but can handle himself easily in a fight. Rather than going lightsaber to lightsaber with another jedi, he will try to merely kill them at a distance with the force.
