Description: The LD B-Wing is a variant of the Rebel Starfighter designed for sale to the general public, taking the success of the B-Wing as a bomber and heavy starfighter for the non-military market. Removing the Proton Torpedo launchers and adding extra Laser and Ion cannons to compensate, the LD is a powerful and dangerous starfighter. However compared to the other starfighters released in the years after the fall of Emperor Palpatine the LD B-Wing is a slow and unmanueverable design which doesn't stand out from the crowd at all.
