Description: The Panther Stealth Fighter is the newest and greatest fighter available to the Mandalorian Empire. Built around a cloaking Device, with vectored thrust available from its powerful main drive the Panther makes a superb weapons platform even before you take into account its vast array of weapons. The Panther carries powerful laser and ion cannons, and also is equipped with 4 Smart Concussion Missiles each loaded in its own launcher, the launchers can be configured by the pilot to fire in ripples (the pilot can fire missiles more than one at a time to get the effect of fire linking the missile launchers), the ship also carries two Atomic Compression Missiles in their own launchers but these cannot be reconfigured.
