Description: The Republic Troop Transport is the New Republics answer to the AT-AT walker which being newer technology is reasonably better. Although the RTT is less well armoured, it is as well armed and is faster, and being a repulsor-lift vehicle does not rely on the terror that a walker was designed to cause for some of its effectiveness, because this would not fit in with New Republic policies. The RTT is an evolution of older designs, using principles from the Old Republic Juggernaut and Trade Federation MTT, and the influence from these vehicles can be seen in the RTT's design and operation.
