Description: As the Empires manufacturing capability became reduced as more of the galaxy fell to the New Republic its ability to create ATAT and ATST walkers became too small to meet demands, so Repulsor Tanks came into greater use. however Repulsor tanks did not have the transport and command facilities of an ATAT walker, plus an ATAT walker could not keep up with the speed of repulsorlift vehicles. So the RMCC was created, capable of handling all of the battle command and control for an entire army, but also if available in large enough numbers to transport squads and cargo to the battlefield. The RMCC design combines the speed of a repulsorlift vehicle with the armour and weapons of a walker.
