Description: The Silver Castle is the flagship of the Mandalorian fleet, built from technology captured after

the fall of the Empire, when the Mandalorians took advantage of the chaos which was occurring to capture the imperial facility at the Maw. The Silver Castle has the same armour plating as developed for the Sun Crusher, and a superlaser as designed for the Death Stars. However the quantity of armour needed for this massive structure would have been out of the production capability of Empire, as would the relative small size of the super laser used. The massive size of this vessel, means that an eco system has sprung up within the bowels of the ship, with various lifeforms living off of the waste products of the vessel and its crew.
