Description: This was the standard fighter used by the Sith military when the Sith War started, and piloted by their Massassi pilots. These ships were obviously from a more primitive technology than the New Republic and Galactic Empiure use, but are sturdy and expendable vessels. They have now been mainly phased out to be replaced by various Tie models since the start of the Sith alliance with the Empire, but some have been kept on reserve because of the lack of trust the Sith have in their alliance.
